Subject: Dr. Ramesh's letter- Reg WITNESS

To: sunilchore@gmail.com

Dear Mr. Sunil,

I am very impressed by your presentation on various features of Witness. In my opinion, this software is a very good add on for the industrial engineers in optimizing the plant layout, scheduling, identifying the various bottlenecks in the process, reducing the manpower by assigning multiskilled job, SMED exercises, downtime features etc. More interesting feature is its compatibility with the windows excel platform, which will be very useful to all, as we need not have to purchase another software to run this software. overall, this software is very user friendly.

As the professor in the field of Lean Manufacturing, i will definitely recommend this software for my higher ups.

As regards to the purchase, we may certainly take up this decision during the TEQIP 2 phase, which may be declared during august 2010. this TEQIP initiative is the world bank assistance given to the engineering colleges to promote R & D efforts. Hence, we will be in a position to take a positive decision during august or September 2010.

However, I had a very good chat/web conference with Mr. Ganesh and thank him for his time. If you need any further information from my end, you can call either to me - 919986304191 or to my Head of the Department Dr. K.V.Sreenivasa Prasad, kvsprasad3@yahoo.com - 9886350484

Thanks for calling

With Regards

Dr. V.Ramesh
