Subject: Feedback on Automation Studio Software and Training

Dear Sir,

Automation Studio software with its latest version is found very much useful as per the curriculum part of department and Automation Technology. It is easy to teach the Hydraulic, Pneumatic & PLC topics with the help of Software.

Fluid Power circuit design and its control using Electrical Methods and PLCs & HMI is integrated within the software, which is a need of Industrial Automation. Virtual Interface of Different systems like Hydraulic with PLC or HMI or Digital Electronics is useful to understand the working of real systems.

Overall Training and Software capabilities are sufficient to make students Industry Ready.

Thank You,

Regards,

Dr. Vishal Sharma
